Summary

Graduate Software Engineer with expertise in Full-Stack Development and Mobile Application Development. Skilled in Java Spring Boot, React, React Native, and Flutter, with experience in building scalable and secure applications. Proficient in API development, cloud integration, and Firebase, with a strong background in GitLab and SonarQube for version control and code quality assurance. Experienced in backend development, front-end design, and mobile app development, ensuring seamless user experiences. Known for problem-solving, analytical thinking, and a collaborative approach to software engineering. Passionate about leveraging modern technologies to drive innovation and create impactful solutions.

Education

BEng (Hons) Software Engineering 2021 – November 2024

- Informatics Institute of Technology (IIT)
- Lower Second Honours

G.C.E Advanced Level Feb 2007 – Sep 2020

- Dharmaraja College, Kandy

Work Experience

AbsolX — Flutter Developer (Rise Management App) February 2025 – June 2025

- Spearheading the development of the Rise Management App, a feature-rich, AI-powered mobile application tailored for managing the operations of Rise Tech Village.
- Using Flutter to build a cross-platform mobile interface with modules spanning HR, Finance, Inventory, Sales, Procurement, AI Grow, CCTV Monitoring, and more.
- Integrated advanced features such as an AI chatbot, predictive analytics, real-time monitoring, and customizable dashboards to empower smarter decision-making.
- Collaborated with backend engineers using FastAPI, and ensured secure, scalable deployment via AWS/Azure cloud infrastructure.
- Focused on delivering a mobile-first, cloud-integrated solution with intuitive UI/UX, real-time alerts, and workflow automation.

Forciva — Flutter and Web Developer 2025 – Present

MaleTaxi (MTCC) — Production ride-hailing platform (Play Store)

- Delivered the customer and driver Flutter apps for MaleTaxi (MTCC), a production ride-hailing platform for iOS and Android, covering booking, trip lifecycle, payments, and in-ride communication.
- Built the full customer flow: OTP / Google / Apple sign-in, live map booking, fare estimate, vehicle selection, driver assignment, ride tracking, trip history, ratings, SOS, and payment receipts (card, QR, TAP, wallet).
- Built the driver app for online/offline status, incoming trip accept/reject, navigation, trip progress, and in-app voice calls with Agora, plus a foreground service so trip and call events still arrive when the screen is off.
- Integrated REST APIs and Socket.IO for real-time driver location, trip status, chat, and incoming-call events, including reconnect handling when the phone switches Wi-Fi and cellular.
- Developed the operations admin portal (React, Vite, Ant Design): live vehicle map, trips, drivers, vehicles, wallets, payments, pricing, SOS, call-centre booking, and sales/trip reports.
- Shipped production releases (Play Store / Codemagic iOS) with crash reporting, secure token storage, and map tile caching so the booking map stays usable on weak networks.

Ceyjobs.lk — Job Portal

- Spearheaded the job portal (Ceyjobs.lk) with React and Next.js, including separate user and admin dashboards.
- Built the Firebase backend (Firestore, Cloud Functions): auth, file uploads, subscription payments, SMS/email notifications.
- Added resume builder with PDF download, job search filters, and an employer analytics dashboard.

Projects

Management App: AI-Integrated Smart Management System February 2025 – Present
Management App

- Developed the frontend of the Management App using Flutter, ensuring a seamless and intuitive user experience.
- Designed and implemented UI components to support AI chatbot integration, enhancing automation and user interaction.
- Optimized the app's performance and responsiveness, ensuring efficient data visualization for structured and unstructured information.

Online Penalty Pay: Digital Fine Payment System Aug 2024 – Oct 2024

Digital Fine Payment System

- Developed the frontend using React Native, ensuring a user-friendly and seamless mobile experience.
- Designed and implemented UI components for secure online transactions, enhancing accessibility and ease of payment.
- Integrated Firebase for real-time database management and authentication, ensuring data security and reliability.

AnimateForge: A Developer-Focused UI Animation Library July 2025 – Present

animateforge.com

- Developed a responsive and interactive web platform using Next.js, React, and Tailwind CSS to provide developers with a curated library of copy-and-paste UI animations.
- Implemented a dynamic component viewer that provides framework-specific code snippets (React, Vue, Svelte), significantly reducing implementation time for users.
- Engineered an interactive preview system allowing users to customize animation parameters like speed and color in real-time.
- Deployed the application to Firebase Hosting, configuring custom domain DNS settings and SSL to ensure global availability and security.

Soft Skills

- Leadership Skills
- Strong Team Player
- Good Communication Skills
- Time Management
- Analytical Skills
- Critical Thinking

Skills

Languages: Dart, Java, JavaScript, Python
Databases: MySQL, Firebase
Frameworks: React, Spring Boot, Flutter, React Native
Tools & Technologies: GitHub, Git, Firebase
